Subject: Town of Woodbury - electric pricing

Hi Desiree and Laura,

Good afternoon.

It was great seeing you both this morning.

As per David's requests for the Town of Woodbury Board meeting here is the electric renewal information.

- The Town is currently contracted at \$.0751 per kWh and with the additional Clean Energy Standard charges of \$.00347 per kWh, it's a total of \$.0786 per kWh.
- M&R Energy requested electric supply bids from 4 competitive and reputable suppliers. The lowest bid was submitted by Engie (formerly GDF Suez).
- Their pricing options including the Clean Energy Standard charges are:
 - 24-months - \$.07111 per kWh, annual savings of \$3500
 - or

- 36-months - \$.07214 per kWh, annual savings of \$3,040
- I will request best and final pricing on Thursday morning, then I will email to you the results along with the winning bidders supply contracts for both the 24 and 36 month terms.
- David we need to sign the contract for the term that the Board actually accepts.

Thank you both for all of your assistance.

Please let me know if you need any additional information.

Have a terrific day.

Sincerely,

Melissa A. Cobuzzi, President
